Summary

AI & Data Science undergraduate with hands-on experience in machine learning, computer vision, and offline Large Language Model (LLM) systems. Skilled in building end-to-end ML pipelines, Retrieval-Augmented Generation (RAG), and Python-based AI applications. Passionate about developing privacy-preserving AI solutions and actively seeking internship or entry-level opportunities in AI and Data Science.

Education

B.Tech – Artificial Intelligence & Data Science

Yashoda Technical Campus, Satara

2022 – 2026 (Pursuing)

HSC — Yashwantrao Chavan Institute of Science, Satara

2020 – 2022

SSC — Sarasvati Vidyalaya, Koregaon, Satara

2020

Projects

Object Detection System

- Developed a real-time object detection system to identify and classify multiple objects from live camera feeds and static images.
- Designed a complete computer vision pipeline including preprocessing, model inference, and result visualization.
- Improved detection performance through optimized preprocessing and model tuning.

Technologies: Python, OpenCV, TensorFlow / PyTorch, NumPy

Movie Recommendation System

- Built a content-based movie recommendation system to suggest movies based on user preferences.
- Developed an interactive web application using Streamlit.

Technologies: Python, Pandas, Scikit-learn, Streamlit

AutoML Pipeline for Automated Model Selection

- Developed an end-to-end AutoML pipeline that automates data preprocessing, multi-model training, hyperparameter optimization, and best model selection for tabular classification datasets.
- Implemented hyperparameter tuning using Optuna and evaluated models using weighted F1-score to support numeric and categorical target labels.
- Built an interactive Streamlit web application allowing users to upload datasets, configure AutoML settings, visualize results, and generate reusable trained models.

Technologies: Python, Pandas, NumPy, Scikit-learn, Optuna, Streamlit, Matplotlib, Seaborn

Offline Large Language Model (LLM) System

- Built a fully offline LLM-based question answering system using RAG architecture.
- Implemented PDF document ingestion, chunking, embedding, and vector storage.
- Enabled private, low-latency AI inference using local LLMs executed via PowerShell.

Technologies: Python, Ollama, LLaMA, LangChain, ChromaDB, PowerShell

Internship Experience

Python Full Stack Developer – Virtual Internship

AICTE & EduSkills

Apr 2025 – Jun 2025

- Developed full-stack web applications using Python and Django.
- Designed frontend using HTML and CSS and integrated MySQL database.

Technical Skills

Programming: Python, Java, C

Machine Learning & GenAI: NumPy, Pandas, Scikit-learn, Pytorch, TensorFlow, Keras, LangChain

Computer Vision: OpenCV

Web: HTML, CSS, Streamlit

Databases: SQL, MySQL, ChromaDB

Tools: Jupyter Notebook, PyCharm, VS Code, Power BI

Soft Skills

• Problem Solving • Teamwork • Communication • Adaptability • Time Management • Critical Thinking
